EXAMINER

REDDIG, PETER J

ART UNIT	PAPER NUMBER
----------	--------------

1642

DATE MAILED: 08/07/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/715,066

Applicant(s)

O'BRIEN ET AL.

Examiner

Peter J. Reddig

Art Unit

1642

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 May 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) 5-20 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-4 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 2/2/04, 5/9/05.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- ☐ Notice of Informal Patent Application (PTO-152)
- ☒ Other: Appendix 1.

DETAILED ACTION

Election

1. The response filed on May 15, 2006 to the restriction requirement of April 24, 2006 has been received. Applicant has elected Group 1, claims 1-4 for examination without traverse.
2. Claims 1-20 are pending.
3. Claims 5-20 have also been withdrawn from further consideration by the examiner under 37 CFR 1.142(b) as being drawn to non-elected inventions.
4. Claims 1-4 are currently under consideration.

Specification Objections

5. The abstract of the disclosure is objected to because it exceeds the maximum length of 150 words. Correction is required. See CFR § 1.72
6. The disclosure is objected to because of the following informalities:

The teaching, “The **genomic** (emphasis added) DNA for the CA125 gene is set out in SEQ ID NO: 4” [0041], line bridging p. 10 and 11, [0043], 1st line, in stating the SEQ ID NO: 4 is genomic DNA contradicts the following teachings, “A full length cDNA molecule for CA125 is set out in Table 4 and SEQ ID NO: 4 p. 4”, lines 16 -17, and “The isolated cDNA sequences (Table 4 and SEQ ID NO: 4) of the present invention can be inserted into an expression vector”, [0043], first line, which state that SEQ ID NO: 4 is a cDNA molecule.

Appropriate correction is required.

Priority

7. Examiner has established a priority date of November 15, 2002 for claims 1 and 2 of the instantly claimed serial number 10/715,066 because pending claim 1 recites an isolated nucleic acid molecule encoding CA125, which reads on an isolated nucleic acid molecule encoding the full-length CA125. Pending claim 2 recites the isolated nucleic acid molecule of claim 1 comprising the sequence of SEQ ID NO: 4. A review of the parent applications only supports the claimed limitations in provisional application 60/427,045, which has a filing date of November 15, 2002. Applicant is invited to submit evidence pointing to the serial number, page and line where support can be found establishing an earlier priority date.

Examiner has established a priority date of November 17, 2003 for claim 3 of the instantly claimed serial number 10/715,066 because pending claim 3 recites the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4 and a review of the parent applications did not reveal support for the claimed limitations of a sequence that has at least about 70% homology with SEQ ID NO: 4. Support for an isolated nucleic acid molecule encoding CA125, the isolated nucleic acid molecule of encoding CA125 comprising the sequence of SEQ ID NO: 4, and the molecule which is a fragment of the isolated nucleic acid molecule comprising the sequence of SEQ ID NO: 4 was found in one or more of the parent applications. Applicant is invited to submit evidence pointing to the serial number, page and line where support can be found establishing an earlier priority date.

Examiner has established a priority date of April 17, 2001 for claim 4 of the instantly claimed serial number 10/715,066 because pending claim 4 recites the isolated nucleic acid

Art Unit: 1642

molecule of claim 2 wherein said molecule is a fragment thereof. A review of the parent applications revealed the claimed limitations.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected for being indefinite in the use of CA125 as the sole means of identifying the claimed isolated nucleic acid molecule. The use of only laboratory designations to identify a particular isolated nucleic acid molecule renders the claim indefinite because different laboratories may use the same laboratory designations to define completely different nucleic acid molecules. Amendment of the claims to include the SEQ ID NO: is required, because SEQ ID NO: are unique identifiers which unambiguously define a given nucleic acid molecule.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1642

9. Claims 3 and 4 are rejected under 35 USC 112, first paragraph, as lacking an adequate written description in the specification.

Claims 3 and 4 are drawn to the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4 (claim 3) and the isolated nucleic acid molecule of claim 2 wherein said molecule is a fragment thereof (claim 4).

Claims 3 and 4 encompass a genus of widely varying species of isolated nucleic acid molecules comprising the sequence of SEQ ID NO: 4 which are at least about 70% homologous with SEQ ID NO: 4 or a fragment thereof. The only species presented are SEQ ID NO: 4 (the full length cDNA of CA125), SEQ ID NO: 3 (a DNA sequence showing the carboxy terminal domain of the CA125 molecule), SEQ ID NO: 2 (a DNA sequence showing the extracellular repeat portion of the CA125 molecule), and SEQ ID NO: 1 (a DNA sequence showing the extracellular amino terminal domain of the CA125 molecule), see [009].

The findings in University of California v. Eli Lilly and Co., 119 F.3d 1559, 43 USPQ2d 1398 (Fed. Cir. 1997) and Enzo Biochem, Inc. V. Gen-Probe Inc. are relevant to the instant claims. The Federal Circuit addressed the application of the written description requirement to DNA-related inventions in University of California v. Eli Lilly and Co., 119 F.3d 1559, 43 USPQ2d 1398 (Fed. Cir. 1997). The court stated that "[a] written description of an invention involving a chemical genus, like a description of a chemical species, requires a precise definition, such as by structure, formula, [or] chemical name,' of the claimed subject matter sufficient to distinguish it from other materials." Id. At 1567, 43 USPQ2d at 1405. The court also stated that

a generic statement such as "vertebrate insulin cDNA" or "mammalian insulin cDNA" without more, is not an adequate written description of the genus because it does not

Art Unit: 1642

distinguish the genus from others, except by function. It does not specifically define any of the genes that fall within its definition. It does not define any structural features commonly possessed by members of the genus that distinguish them from others. One skilled in the art therefore cannot, as one can do with a fully described genus, visualize or recognize the identity of the members of the genus. A definition by function, as we have previously indicated, does not suffice to define the genus because it is only an indication of what the gene does, rather than what it is.

Id. At 1568, 43 USPQ2d at 1406. The court concluded that "naming a type of material generally known to exist, in the absence of knowledge as to what that material consists of, is not a description of that material." Id.

Finally, the court addressed the manner by which a genus of cDNAs might be described. "A description of a genus of cDNAs may be achieved by means of a recitation of a representative number of cDNAs, defined by nucleotide sequence, falling within the scope of the genus or of a recitation of structural features common to the members of the genus, which features constitute a substantial portion of the genus." Id.

The Federal Circuit has recently clarified that a DNA molecule can be adequately described without disclosing its complete structure. See Enzo Biochem, Inc. V. Gen-Probe Inc., 296 F.3d 1316, 63 USPQ2d 1609 (Fed. Cir. 2002). The Enzo court adopted the standard that "the written description requirement can be met by 'show[ing] that an invention is complete by disclosure of sufficiently detailed, relevant identifying characteristics.... i.e., complete or partial structure, other physical and/or chemical properties, functional characteristics when coupled with a known or disclosed correlation between function and structure, or some combination of such characteristics." Id. At 1324, 63 USPQ2d at 1613 (emphasis omitted, bracketed material in original).

Thus, the instant specification may provide an adequate written description of the widely varying genus of isolated nucleic acid molecules of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4 and the isolated nucleic acid molecules of claim 2 wherein said molecules are a fragment thereof, per Lilly by structurally describing a representative number of isolated nucleic acid molecules wherein the sequence has at least about 70% with SEQ ID NO: 4 or fragments of the isolated nucleic acid molecule of claim 2 or by describing "structural features common to the members of the genus, which features constitute a substantial portion of the genus." Alternatively, per Enzo, the specification can show that the claimed invention is complete "by disclosure of sufficiently detailed, relevant identifying characteristics, functional characteristics when coupled with a known or disclosed correlation between function and structure, or some combination of such characteristics."

In this case, the specification does not describe the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4 and the isolated nucleic acid molecule of claim 2 wherein said molecule is a fragment thereof in a manner that satisfies either the Lilly or Enzo standards. The specification does not provide the complete structure of the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4 and the isolated nucleic acid molecule of claim 2 wherein said molecule is a fragment thereof, nor does the specification provide any partial structure of such isolated nucleic acid molecule, nor any physical or chemical characteristics of the isolated nucleic acid molecule nor any functional characteristics coupled with a known or disclosed correlation between structure and function. Although the specification discloses SEQ ID NOs: 1-4, this does not provide a description of an isolated nucleic acid molecule of claim 2

Art Unit: 1642

that has at least 70% homology with SEQ ID NO: 4 or the isolated nucleic acid molecule of claim 2 molecule which is fragment thereof that would satisfy the standard set out in Enzo.

The specification also fails to describe the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4 and the isolated nucleic acid molecule of claim 2 wherein said molecule is a fragment thereof by the test set out in Lilly. The specification describes only SEQ ID NO: 4. Therefore, it necessarily fails to describe a "representative number" of such species. In addition, the specification also does not describe "structural features common to the members of the genus, which features constitute a substantial portion of the genus."

Thus, the specification does not provide an adequate written description of the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4 and the isolated nucleic acid molecule of claim 2 wherein said molecule is a fragment thereof required to practice the claimed invention. Since the specification fails to adequately describe the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4 and the isolated nucleic acid molecule of claim 2 wherein said molecule is a fragment thereof, it also fails to provide a written description for these products.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

10. A person shall be entitled to a patent unless –

Art Unit: 1642

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 2 are rejected under 35 U.S.C. 102(a) as being anticipated by O'Brien et al. (Tumor Biology, 2002 May-Jun; 23:154-69, IDS) as evidenced by GenBank accession No. AF414442, version AF414442.2 (Appendix 1).

Claim 1 is drawn to an isolated nucleic acid molecule encoding CA125. Claim 2 is drawn to the isolated nucleic acid molecule of claim 1 comprising the sequence of SEQ ID NO: 4.

O'Brien et al. teach, as evidenced by GenBank accession No. AF414442, version AF414442.2, an isolated nucleic acid molecule encoding CA125 and the isolated nucleic acid molecule of claim 1 comprising the sequence of SEQ ID NO: 4, p. 159, right column.

11. A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 3 is rejected under 35 U.S.C. 102(b) as being anticipated by O'Brien et al. (Tumor Biology, 2002 May-Jun; 23:154-69, IDS) as evidenced by GenBank accession No. AF414442, version AF414442.2 (Appendix 1).

Claim 3 is drawn to the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4.

Art Unit: 1642

O'Brien et al. teach, as evidenced by GenBank accession No. AF414442, version AF414442.2, the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4, p. 159, right column.

Claims 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by NCI-CGAP (GenBank Accession No. AA640762, October 28, 1997).

Claim 3 is drawn to the isolated nucleic acid molecule of claim 2 wherein the sequence has at least about 70% homology with SEQ ID NO: 4. Claim 4 is drawn to the isolated nucleic acid molecule of claim 2 wherein said molecule is a fragment thereof.

Claims 3 and 4 read on fragments of the isolated nucleic acid molecule encoding CA125.

NCI-CGAP teaches an isolated nucleic acid molecule of claim 2 wherein said molecule is a fragment thereof.

Double Patenting

12. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 2-4 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 25-27 of copending Application No. 10/475,117. SEQ ID NO: 314 of

Art Unit: 1642

Application No. 10/475,117 is the full-length cDNA molecule for CA125, see [0009], lines 25-26.

The claims of Application No. 10/475,117 are drawn to an isolated nucleic acid comprising the sequence of SEQ ID NO: 314 (claim 25), an isolated nucleic acid molecule of claim 25 wherein the sequence has at least about 70% homology with SEQ ID NO: 314 (claim 26), and the isolated nucleic acid molecule of claim 25 wherein said molecule is a fragment thereof (claim 27).

This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

13. If applicant disagrees with any rejection set forth in this office action based on examiner's establishment of a priority date November 15, 2002 for claims 1 and 2 and November 17, 2003 for claim 3 of the instantly claimed application serial number 10/715,066, applicant is invited to submit evidence pointing to the serial number, page and line where support can be found establishing an earlier priority date.

14. No claims are allowed.

15. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter J. Reddig whose telephone number is (571) 272-9031. The examiner can normally be reached on M-F 8:30 a.m.-5:00 p.m..

Art Unit: 1642

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Siew can be reached on (571) 272-0787. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
